Reviews

Completely essential go through book. This is for all who statte there had not been a worthy of reading through. It is extremely difficult to leave it before concluding, once you begin to read the book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: . . . of Clock, Howard No. On April 29, 1901, this clock was dismantled with the intention of transferring it to the newly constructed clock vault in the basement of the 6-inch transit circle observers room, where it will be kept at a more uniform temperature. After the clock was dismantled, I opened the mercury jars and found that each lacked 0.75 inch (1.90 cm.) of being full. Furthermore, a computation based on the temperature coefficient, 0.06 per degree Fahrenheit, indicates that the jars will not hold enough mercury to compensate the clock. The chronograph. --This is an old one by Alyan Clark and Sons, made from designs by Professor Harkness. When in good repair it served its purpose very well. Barometer and thermometers, and thermometer shelter. --The barometer, GREKN No. 2876, is hung in a glass case on the north side of the clock pier on the west side of the observing room. It is 0.60 inch (1.52 cm.) bore, and has both English and metric scales. The metric scale is used. A thermometer, Grken No. 9361 (Centigrade), graduated to fifths of a degree, is used for refraction. It is mounted in the thermometer shelter on the north side of the building feet (3 m.) from the ground. The corrections to this thermometer and to the attached thermometer of the barometer above mentioned have been accurately determined through the kindness of Prof. C. F. Marvin, of the instrument division...
